Complete your temporary import forms online before you leave

You are allowed to temporarily import a car, 4WD, motorhome or motorbike into Morocco for up to six months per calendar year. Commercial vehicles are limited to three months. In order to take advantage of this scheme you need to complete a declaration of temporary importation form (D16TER). This is normally a three-part no-carbon-required form with a green copy, yellow copy and white copy.

However, several years ago on the Morocco/Mauritania border I saw details of a web-based system you can use to complete your temporary import form (D16TER) for Morocco online, then print it off for handing over when you get there. This saves having to find out which window you need to queue at for the form and means you don't have the hassle of working out how to complete it when all you really want to do is get through the border and ride!
